OPENING OF NEW OFFICE IN SINGAPORE

September 2018

Green Instruments is delighted to share the exciting news that we have just started up our new office in Singapore. The new operation will support Sales and Service of the entire Green Instruments range of products and solutions including but not limited to:

- Monitoring Equipment and Protection Solutions
- Environmental Compliance Solutions
- Energy Optimizing and Safety Solutions

Back in 2015, we established our office in Ft. Lauderdale, USA in order to support the growing market in America for precise analyzers and monitoring solutions. With the achievements and successes in the American market, Green Instruments continues to expand its business areas in the South East Asia.

In response to a growing demand, we have decided to open the office in Singapore, the global number one marine hub. Beside supporting the need for accurate emissions monitoring and protection solution, we have the opportunity to further expand our professional service and customer support in the region.

Asia is also a potentially industrial market for our environmental products and solutions. In order to satisfy our customers' requirements and needs, Green Instruments is constantly improving the current products and working on different development projects for new products and solutions. In the coming years, Green Instruments is confident to win both marine and industrial markets in Asia.

Opening the new office in Singapore is to ensure that existing and new clients of Green Instruments in Asia receive timely service and better support. The new operation will be headed by Jason Pua who has extensive marine and industrial experience. Our clients and customers can contact us at:

Green Instruments (S) Pte. Ltd.
240 Woodlands Industrial Park E5
Woodlands Bizhub, Singapore 757302
Phone: +65 9822 5777
E-mail: pua@greeninstruments.com

We are truly looking forward to being closer to the Asian market and are happy to bring support of our products and solutions close to our partners & clients.
